

The Problem

Underdeveloped and developing nations in our world lack the sophisticated water filtration and sanitation delivery systems we take for granted. Drinking contaminated water leads to sickness and, in the case of young children, death from water-borne diseases including cholera. Water = Life brings clean water to children and to those communities where access to safe water is an on-going problem.

Water=Life™ 

Saving communities one  drop at a time.

**Donate today and
MAKE A DIFFERENCE.**

Did You Know?

-  **1 out of 10 people lack access to clean water ***
-  **Every 90 seconds a child dies from water-related diseases ***
-  **Twice the population of the United States lives without access to clean water ***

Your donation is tax deductible.

The Solution

Water = Life was founded in 2013 by Rev. Elena Delgado and a group of friends living in the Western New York area. Concerned that children in the developing world have limited access to safe water, Water = Life was created with the goal of **“nurturing the human spirit through the gift of clean water.”**

Water = Life adopted the Sawyer Filter System as the preferred method of removing 99.9999% of water-borne diseases. Through donations from caring supporters, Water = Life is providing an effective life-saving solution to vetted communities in Kenya and Haiti. With proper maintenance, the system will last between 5-8 years filtering one million gallons of water. Water = Life continues to bring attention to this pressing need by inviting those who share this concern to **MAKE A DIFFERENCE.**

Water=Life

Haiti Water Filter Project

Water = Life has traveled to Haiti to provide Sawyer SP 180 water filter systems and certified training to communities throughout the island.

Water = Life worked closely with its Haitian advisors who are local leaders in their communities. These advisors provided an on-going presence for Water = Life and conducted follow-up visits to insure proper use and maintenance. They also identified neighboring communities that did not have access to clean water.

Water = Life implements an effective certified training protocol and maintenance policy to insure long term benefits.

To kick-off our newest initiative, Water = Life will focus on providing the gift of clean water to Masaka, located in south west Uganda.

Working collaboratively with the Diocesan Health Coordinator for Health, Wellness and Fitness in Masaka, we provide training and distribution of Sawyer SP 180 water filter systems. To date we have provided water filters to several medical centers and a variety of schools in Masaka.

We need your support to continue our important work in Uganda.

How Can You Help?

By reading this information, you have already begun to change these statistics. Now we ask you to spread the word about Water = Life and its commitment. Visit our website at waterequallife.org to learn more about the filter system, upcoming filter projects, speaking engagements as well as volunteer and sponsorship opportunities.

Your donation does **MAKE A DIFFERENCE.** For example, a **\$50 donation** enables Water = Life to provide a family with one water filter system to supply clean water for drinking, bathing and cooking. Every contribution has a ripple effect. We welcome individual and corporate contributions throughout the year.
